Training Director's Report

Please congratulate the 9 Apprentices who have successfully completed the Apprenticeship Program! Congratulations to Hayden Brown, Evan Deiters, Bethany Glisson, Anthony Evans, Briana Evans, Kenneth Greene, Devon Krendl, Doug Shaffer and Coy Stauffer! I'm so proud of you all!

I'm excited to announce that we have broken ground on the new building at the training center! This new building will provide additional lab space for classes for Apprentices and Journeyman!

We are in the process of testing and interviewing candidates for this year's Apprenticeship Program. We have a number of excellent applicants, and I look forward working with them in the future!

Unfortunately, we have had to cancel the welding class due to lack of participation. To date, we are still hoping to have the CDL class. If you are interested, please contact me for details.

As always, let me know if you have any suggestions.

The Ole' Guys

The May Retirees spent another enjoyable afternoon with a rowdy group of electricians. We learned many things including how the county engineer will lay out your property lines if asked. You should be fully informed before living in a Home Owners Assoc. (HOA). The realities of skin cancer, and we even learned some previously unknown facts about various religions.

It is amazing the things you can learn from a group of old electricians! Join us on June 12th @ 2PM and bring some little known fact about anything and have, as always, an enjoyable afternoon.

The unselfish effort to bring cheer to others will be the beginning of a happier life for ourselves. --Helen Keller
